

ADMINISTRATIVE PROFESSIONAL POSITIONS MUST QUALIFY FOR ONE OF THE [EXEMPTION CRITERIA](#) SET FORTH IN RCW 41.06.070.

**ADMINISTRATIVE PROFESSIONAL
Benchmark Job Class
Energy Engineer Supervisor/1322**

Function and General Scope

Positions assigned to this class are responsible for supervising an energy-engineering unit including research, publication development, training and technical assistance services. Positions supervise professional engineers and technical support personnel.

Classification Requirements (Minimum Qualifications)

Positions require a Bachelor's degree in a relevant energy engineering discipline and five (5) years of related professional engineering experience which has included at least one (1) year of experience as a senior engineer. A Master's degree in a relevant engineering discipline may be substituted for up to one (1) year of the required experience exclusive of the senior engineering experience. A Professional Engineer's license may be required.
