

ADMINISTRATIVE PROFESSIONAL POSITIONS MUST QUALIFY FOR ONE OF THE [EXEMPTION CRITERIA](#) SET FORTH IN RCW 41.06.070.

**ADMINISTRATIVE PROFESSIONAL
Benchmark Job Class
Network Engineer/Administrator/1357**

Function and General Scope

Positions assigned to this class are responsible for developing and/or maintaining communications network systems. Responsibilities include analyzing network requirements, specifying network equipment, monitoring and correcting network problems, monitoring and enforcing network security, and working with network engineers and customers throughout the world to correct routing problems to insure reliable operations. Responsibility levels range from sole responsibility for complex departmental networks to shared responsibility for University-wide networks that may involve several physical locations and include multiple internet service providers (ISP's.)

Classification Requirements (Minimum Qualifications)

Positions require a Bachelor's degree and three (3) years related professional experience or a combination of education and experience totaling seven (7) years from which comparable knowledge and abilities were acquired.
