EMPLOYEE FEEDBACK:

At the end of the survey, employees were given the opportunity to provide feedback regarding subjects not addressed in the survey. The following feedback, specifically related to employee perceptions of the workplace, was provided by respondents who identified themselves within WSU Spokane:

- As WSU Spokane embraces its new identity as a Health Sciences campus it is important to create context and meaning for the departments not related to (primary) Health Sciences so that we can continue to feel that we are part of what's valued and built upon
- Compensation needs to be reviewed and adjusted as appropriate
- The limited investment in technology infrastructure at WSU does not meet modern expectations of faculty, staff and students
- Limited opportunities for advancement
- Workplace climate concerns, specifically regarding nepotism and discrimination
- Sometimes the focus on the Pullman campus doesn't include the urban campus staff until too late when a decision is already made and then we scramble to figure things out. Any decisions made that will impact all campuses should include all campuses
- For our department to be successful, it needs to be a team atmosphere where we are encouraged to work together as a team

ACTION ITEMS:

In reviewing the lowest area response averages and the statements with negative change from 2014 to 2016 in WSU Spokane, initiatives to improve employee engagement and perceptions of the workplace may include, but are not limited to:

- Improve communication efforts regarding changes at the university level
- Provide employees with resources as appropriate and encourage the use of University resources
- Provide employees with resources for workplace climate concerns and encourage the reporting of concerns
- Evaluate how input is solicited and taken into consideration
