WASHINGTON STATE 🚱 UNIVERSITY	
<b>Budgeting for Sponsored Projects</b>	
Presented by:	
Matt Michener Grant and Contract Coordinator Lead Office of Research Support and Operations	
Jami Capps Director of Finance International Programs	
Kim Akin Fiscal Analyst Sponsored Programs Services	
Updated October 2018	

#### Two main Goals Be able to prepare proposal budget using the ORSO recommended budget template Understand background behind proposal budget preparation for Sponsored Projects, including federal, sate and university guidelines and/or regulations

### What are Sponsored Projects? University projects funded or 'sponsored' by an outside agency Projects designed to accomplish a public good versus furthering a commercial gain Examples of 'sponsors': Federal and state governments, foundations and private industry

Æ.	
	Where to begin?
	Work with the Principal Investigator (PI)     Identify what personnel will be working on the project     Is travel necessary
	Is it allowable by the agency     Is it foreign or domestic     Determine if equipment and supplies are necessary and
	allowable for the project  - Are there subcontracts
	<ul> <li>Will funding meet subcontractors needs for their portion of project</li> </ul>

Where to begin?

• How do I know if costs are allowable?

• Would they be considered REASONABLE by a financially prudent person

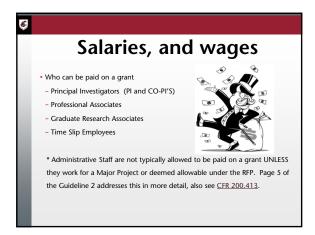

• Are the costs ALLOCABLE: beneficial to both parties and advance the work under the sponsored project

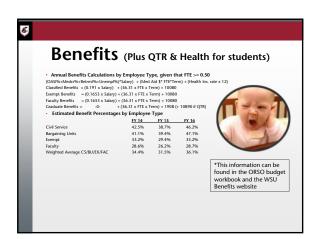

• Are the costs TREATED CONSISTENTLY: are estimates for like items similar, are they normally treated as direct or indirect costs

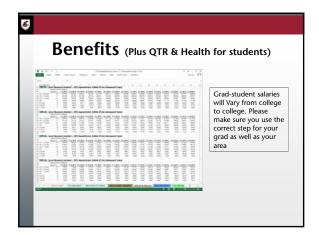

• Are the costs ACCEPTABLE to funding agency: RFP and Agency guidelines will dictate this. READ THEM CAREFULLY

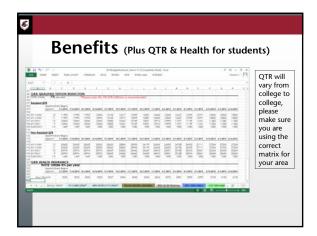

\*Make sure budget allows for enough funds to cover all expenses, but do not Pad the budget

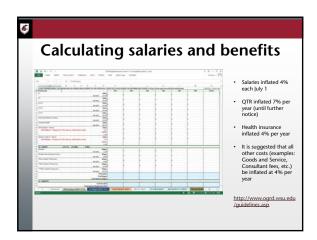

## Understand the typical budget categories Salaries (00) Wages (01) Benefits (07) Goods & Services (03) Travel (04) Capital Equipment (06) Stipends, Fellowships, Participant Support Costs (08) Subcontracts (sub-account created at account set up) (14) Facilities & Administrative Costs – F&A (13)

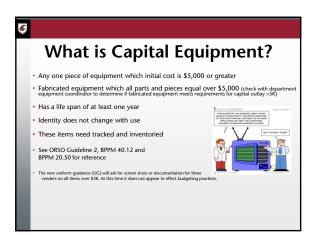

### Goods and Services Only goods and services that directly relate to the project Remember that it needs to be reasonable, allocable, consistent and acceptable to the agency Avoid 'suspicious' items such as: General Office Supplies Lunch for lab meeting Gifts This is the area to budget for research/survey incentives

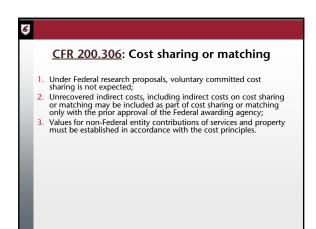

# Travel Only charge for travel that is directly related to the project Must be reasonable, allocable, consistent and acceptable by the agency First/Business class is usually prohibited Must follow the 'Fly America' Act Required by all federal agencies regardless of cost Whenever possible use state or federal government contract rates for airfare, hotels, auto rentals, etc.

#### F&A Calculations Continued • Total costs [TC or total award (TA)] : F&A is calculated on the sum of total direct costs and F&A altogether. • How to convert TC to TDC: TDC = TC / (1- TC) • TC rate is 30%: .30/.70 = 42.857% • TC rate is 10%: .10/.90 = 11.11% • \$150,000 awarded, what are directs and indirect at 15%TC? • .15/.85 = 17.647% for TDC • .150,000/.11/647 = \$127,500 - 127,500\*.17647 = 22,500 • Keeping F&A in mind for your subcontracts. • .We have to calculate F&A on the first \$25K of the subcontract. If our prime agreement allows for F&A on direct charges.

Æ	
	Subcontract Budgeting
	A collaborative agreement where there are substantive programmatic efforts and may include publication rights.
	<ul> <li>A line item in your prime budget should include a subcontract allocation (restricted object 14).</li> </ul>
	Make sure all the appropriate materials are submitted to ORSO:     Scope of work;     Budget, including their appropriate institutional F&A rate;     Letter of Support or Intent.
	<ul> <li>Term date for subcontractor is prior to prime term date.</li> </ul>
	<ul> <li>Distinguishing between a subcontract and a consultant.</li> </ul>

Consultants (Personal Services) vs.
Subcontracts:

• Consultant - Specific needs of the SOW that cannot be completed by personnel within the institution, IF allowable by the agency/organization's RFP

• Subcontract - A collaborative arrangement in support of a research project in which some portion of the programmatic activity is carried out through a formalized agreement between the grantee and one or more other organizations.

• Must be appropriate for the project and scope of work, in collaboration or cooperation with a peer at another organization/institution/agency
